Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, claims 1-23 and 31-36 in the reply filed on June 1, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 24-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II and III, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 1, 2006.

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because of the reason found on the PTO-948 form. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 15-21 and 31-36 are rejected under 35 U.S.C. 102(b) as being anticipated by McGuire et al. (U.S. Patent No. 5,797,918).

McGuire et al disclose a surgical driver comprising an attachment piece having mounting structure, a shaft connected to the attachment piece (14) by a coupling arrangement being configured to transfer torque from the shaft to the attachment piece and permit the shaft to pivot relative to the attachment piece in a range of 1-30 degrees in any direction. The coupling arrangement includes one or more facets formed at a distal end of the shaft that permit the shaft to pivot in a range of axial orientations relative to a longitudinal axis of the attachment piece. The facets are located adjacent to a base of a knob (20). The coupling arrangement includes a recess formed in the attachment piece, the recess being configured to receive a distal end of the shaft. The attachment piece further includes a retaining member, and wherein at least a portion of the retaining member is positioned within the recess to detachably connect the shaft to the attachment piece. The attachment piece includes self-centering structure that axially aligns the shaft with the attachment piece when the shaft is initially connected to the attachment piece because of the shape of the attachment piece when it is attached to the shaft. This device further including a handle coupled to a proximal end of the
